To Whom It May Concern

Alexey Morozov is one of our technicians who has joined our team since November 2009. Alexey's responsibilities within the organization are;

- Construction / Assembling of 220/400 VAC and DC switchboards
- On board servicing and repair of electrical and electronic equipment
- Installation and servicing of switchboards and distribution boards;
- Testing and commissioning
- Supervising trainees during panel building.

Mr. Morozov is highly knowledgeable and experienced in the electrical and electronic field. He has also been successfully trained for safety at work, in order to improve his capabilities for working in hazards environments such as a ship's machinery space.

I know Alexey as a reliable and efficient person, which can work in a team environment and would communicate at any level with in the company. Furthermore he can work under pressure and is able to deliver and complete task successfully ahead before schedule.

I find Alexey very trust worthy person, safe to work with and would comfortably recommend him in performing such mentioned above tasks.
